

URSUS

READINESS REIMAGINED

URSUS is a responsive web application designed to return time back to Airmen and Squadron Commanders that is typically lost during the Deployment Process. This Airmen driven solution utilizes modern software development practices to continuously deliver new capabilities and transform how we manage the Individual Protective Equipment (IPE) function.

DIGITAL STOREFRONT

URSUS optimizes the Individual Protective Equipment (IPE) process through Airmen-centered design which provides clean and responsive user navigation.
